Unspool brand kit

unspool.cc — "One document into reels." Everything here is generated by `scripts/generate.mjs` (`cd brand/scripts && npm install && node generate.mjs`). SVG sources for every marketing PNG are in `masters/`. See `contact-sheet.png` for an overview.

Colors

Token	Hex	Use
paper	`#0f1d18`	Background, dark logo ink
surface	`#152820`	Cards, panels
line	`#24402f`	Borders, rules
ink	`#e9f0e4`	Primary text on dark
muted	`#8ea595`	Secondary text
thread	`#d3f05a`	Primary accent (chartreuse)
sage	`#7fd3a6`	Secondary accent
coral	`#ff8b6c`	Secondary accent
butter	`#f2d36b`	Secondary accent

Style: flat, square corners, no gradients, no glows, editorial.

Fonts (in `fonts/`, SIL OFL, from Google Fonts)

- **Syne 800** — wordmark only, lowercase "unspool", tracking -0.02em.
- **Unbounded 700** — marketing headlines ("One document **into reels**", accent words in thread).
- **Instrument Sans 400–600** — body, UI, captions, URLs.

Taglines: "One document into reels." / "Skip the 40-page read."

Logo usage

- Mark = spool + thread + reel with play triangle (geometry = `public/icon.svg`, 64 grid).
- Clear space: at least the mark's flange height x2 (≈ 25% of mark height) on all sides.
- Minimum size: mark 16 px (favicon); horizontal lockup 96 px wide; wordmark 64 px wide.
- On dark: `mark.svg`, `mark-transparent.svg`, `wordmark.svg`, `lockup-*.svg`. On white/light: `mark-light-bg.svg`, `wordmark-dark.svg`, `lockup-*-light.svg`.
- Don't: recolor the mark outside these schemes, add gradients/shadows/glows, round the corners, stretch, rotate, set the wordmark in another font or uppercase, put the chartreuse version on white.

Files

File	Size	Where
logo/mark.svg, mark-512/1024.png	512², 1024²	Primary mark on dark square
logo/mark-transparent.svg (+png)	512², 1024²	Over dark images/backgrounds
logo/mark-light-bg.svg (+png)	512², 1024²	White backgrounds, docs, invoices
logo/wordmark(.svg/-512/-1024)	512/1024 wide	Light wordmark for dark bg
logo/wordmark-dark(.svg/…)	512/1024 wide	Dark wordmark for light bg

logo/lockup-horizontal(-light).svg / -2000.png	2000 wide	Headers, decks, partner pages
logo/lockup-stacked(-light).svg / -2000.png	2000 wide	Square-ish placements
favicon/favicon.ico (16/32/48), favicon-16/32/48.png		Site `/favicon.ico`
favicon/apple-touch-icon-180.png	180²	iOS home screen
favicon/android-chrome-192/512.png, maskable-512.png, site.webmanifest		PWA manifest (maskable glyph inside 80% safe zone)

email/email-header-logo-480x120.png	480×120	Supabase / Resend email header (dark)
auth/google-oauth-logo-120.png	120²	Google Cloud → OAuth consent screen logo
misc/app-icon-1024.png	1024²	App Store icon (opaque)
misc/loading/splash-1080x1920.png	1080×1920	Splash / loading screen

Platform notes

- Profile images (X, IG, TikTok, YT, FB, LinkedIn) are cropped to circles: glyph is scaled to 74% so corners stay inside.
- Stories/TikTok: nothing important in the top 250 px or bottom 340 px; TikTok grid crops to centre 3:4.
- YouTube: banner safe area 1546×423 centred; outer area only shows on TV/wide desktop.
- Facebook cover: mobile shows only centre ~1110 px; avatar overlaps bottom-left on desktop.

Logo

Mark (dark)

Mark (light backgrounds)

Horizontal lockup (light backgrounds)

YouTube

Channel banner, 2560×1440 (logo and text inside the central 1546×423)

Default thumbnail, 1280×720

Profile picture, 800×800

X (Twitter)

Header, 1500×500

Profile picture, 400×400

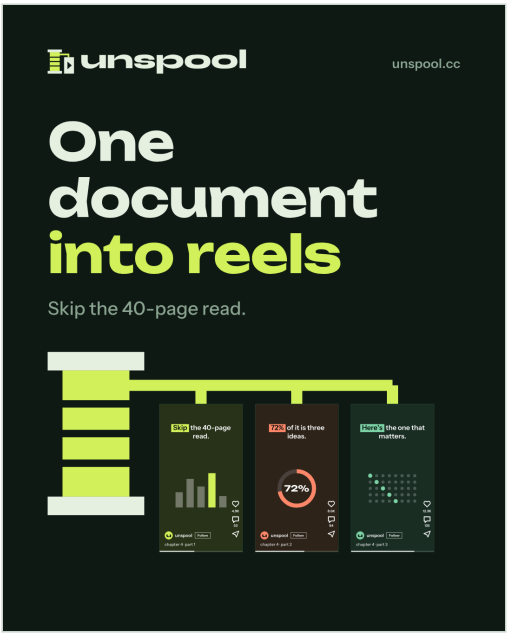

Link preview card, 1200×630 (also used for iMessage, Slack, Facebook and LinkedIn previews)

Instagram

Square post, 1080×1080

Portrait post, 1080×1350

Story / Reel cover, 1080×1920
