Unspool tier model

10,000,000 registered users · usage-based tiers · October 2026 · all figures are assumptions, not forecasts

1. Tiers (monthly reel credits)

1 credit = 1 generated reel. A document uses as many credits as reels it needs (3–15). The free tier is sized to show the product working on one or two real documents, then run out: that is the hook into Plus.

Tier	Price / month	Credits / month	Max pages / doc	Extras
Free	$0	15 (~2 docs)	20	Watermark, sharing
Plus	$7.99	150 (~20 docs)	60	No watermark
Pro	$14.99	500 (~65 docs)	150	Priority queue, longer reels
Ultra	$29.99	2,000 (~250 docs)	300	Priority, heavy users / teams
Top-up	$2.49 once	+20, never expire	—	Any tier

2. Assumptions

- **User mix at 10M:** 94% free, 4% Plus, 1.5% Pro, 0.5% Ultra (6% paying overall, in line with typical freemium consumer apps; this is an assumption, not measured).
- **Top-ups:** 2% of all users buy one $2.49 pack per month.
- **Usage:** 30% of free users are active in a month and use ~10 credits; paid users use about 40% of their quota on average (Plus 60, Pro 200, Ultra 600 reels). Heavy tiers rarely max out, which is what makes them profitable.
- **AI cost per reel:** $0.03 (script on Claude Haiku, OpenAI TTS, ~5 FLUX images, render). Today's estimate is ~$0.035–0.04; at 10M users volume pricing and cheaper models are assumed to bring it down. See sensitivity below.
- **Stripe:** 2.9% + $0.30 per charge. **Infra:** $300k/month for hosting, database, video storage and bandwidth at this scale (rough).
- **Not included:** salaries, marketing, support, refunds/chargebacks, taxes, VAT. Real profit is lower.

3. Monthly model at 10M users

Tier	Price	Credits	Share	Users	Revenue / mo	Reels / mo
Free	Free	15	94.0%	9,400,000	$0	28,200,000
Plus	$7.99	150	4.0%	400,000	$3,196,000	24,000,000
Pro	$14.99	500	1.5%	150,000	$2,248,500	30,000,000
Ultra	$29.99	2,000	0.5%	50,000	$1,499,500	30,000,000
Top-up pack	$2.49 once	+20	2.0% buy 1/mo	200,000	$498,000	4,000,000

Line	Per month	Per year

Revenue	$7,442,000	$89,304,000
Stripe fees	−$455,818	−$5,469,816
AI generation (116,200,000 reels × $0.03)	−$3,486,000	−$41,832,000
Infrastructure	−$300,000	−$3,600,000
Profit before staff, marketing and tax	**$3,200,182**	**$38,402,184**

4. Sensitivity

AI cost per reel (everything else base):

Cost / reel	AI cost / mo	Profit / mo	Profit / yr
$0.02	$2,324,000	$4,362,182	$52,346,184
$0.03	$3,486,000	$3,200,182	$38,402,184
$0.0375	$4,357,500	$2,328,682	$27,944,184

How many people pay (AI at $0.03):

Scenario	Revenue / mo	Profit / mo	Profit / yr
Low (half the paid share)	$3,970,000	$1,151,870	$13,822,440
Base	$7,442,000	$3,200,182	$38,402,184
High (1.5× paid share)	$10,914,000	$5,248,494	$62,981,928

5. What moves the number most

- **Free-tier cost:** free users generate ~28,200,000 reels a month (24% of all reels) and pay nothing. Keep the free quota tight and only generate reels when watched.
- **Paid share:** each extra 1% of users on Plus adds about $565,829/month profit.
- **Pro and Ultra margins:** they pay 2–4× Plus while using a fraction of their quota.

Prepared for planning only. Every rate here is an assumption; replace with real conversion, usage and cost data after launch.
